How Qorvo Ultra-Wideband Elevates Smart Home Ecosystems

00:00:02.936 --> 00:00:09.175

Qorvo's UWB technology elevates the on-boarding experience for your connected home.

00:00:09.209 --> 00:00:13.580

UWB makes adding a new connected or smart device easier than ever,

00:00:14.347 --> 00:00:16.950

no matter where you bought your home hub device.

00:00:16.950 --> 00:00:20.387

It's as simple as plugging in a new microwave.

00:00:20.387 --> 00:00:24.090

A nearby home hub, with Qorvo UWB inside,

00:00:24.357 --> 00:00:29.262

automatically detects the new device, also with Qorvo UWB inside,

00:00:29.696 --> 00:00:33.299

and it's subsequently added to your smart home smartphone app...

00:00:33.633 --> 00:00:35.235

just like that!

00:00:35.235 --> 00:00:38.338

Not only do Qorvo's solutions make onboarding easier,

00:00:38.638 --> 00:00:42.842

they also enhance smart configurations once new devices are onboarded.

00:00:43.943 --> 00:00:46.946

The future of smart lighting is about to get a lot brighter!

00:00:47.680 --> 00:00:49.649

New lighting devices are identified

00:00:49.649 --> 00:00:52.552

in augmented reality to ease installation.

00:00:52.552 --> 00:00:54.220

And with UWB,

00:00:54.320 --> 00:00:57.390
your connected ecosystem
gains true awareness.

00:00:58.191 --> 00:01:02.462
Those new devices, and their location,
are automatically detected

00:01:03.029 --> 00:01:05.832
so you can add them quickly
and seamlessly.

00:01:05.832 --> 00:01:10.003
Say goodbye
to the tedious steps of manual set up.

00:01:10.003 --> 00:01:13.807
Qorvo UWB also enables
other personalized experiences,

00:01:14.441 --> 00:01:17.577
like your TV turning on
because you've walked into the room.

00:01:18.378 --> 00:01:20.814
Thanks to UWB in your smartphone,

00:01:20.814 --> 00:01:23.817
your devices are now aware of each other.

00:01:23.817 --> 00:01:27.020
That's the power of UWB, right in your pocket.

00:01:27.887 --> 00:01:31.925
UWB technology
can also create more immersive

00:01:31.925 --> 00:01:35.995
smart home experiences
like customized lighting environments

00:01:35.995 --> 00:01:39.032
based on who's in the room
and when.

00:01:39.365 --> 00:01:43.570
This is just a sample of how
Qorvo UWB makes the smart home

00:01:43.570 --> 00:01:46.372

user experience truly unique.

00:01:46.973 --> 00:01:50.210

Let's work together
and find more ways to unlock smart living.
