# Fusion20

A next-generation RF Fusion™
5G system solution offering:

- Higher levels of integration
  including Rx LNA and
  integrated RF shielding

- Reduced sensitivity to
 environmental impacts

- Faster time to market

qorvo

### all around you

5G

Fully Shielded. Fully 5G Capable.

In anticipation of the rapid expansion of 5G terminal devices in today's market, Qorvo has developed the industry's leading integrated RF front-end solution. Drawing on generations of system expertise and leveraging established PA, switch and acoustic filter technology, Fusion20 now reaches a new level of performance and capability. By adding receive LNAs and fully integrated RF shielding, Fusion20 greatly improves connectivity, increases resistance to interference and speeds time to market launch.

Integration for All Applications

Fusion20 is optimized to provide the right level of integration for all 5G device applications. Whether the application is global or regional, performance or value, Qorvo offers a Fusion20 option to enable high-performance and ease-of-implementation.

What RF Fusion Can Do For You

Qorvo's product portfolio offers choices for customers looking to optimize their mobile devices for global or regional use. Support for specific bands and features can be selected for any tier of 5G device or for support of any combination of operator spectrum.
